OBJECTIVE

Pioneer HTML Email Marketing Specialist seeks new growth opportunity.

EXPERTISE

- Hand-code HTML emails with responsive HTML and CSS.
- Utilize email best practices, deliverability knowledge, and QA testing.
- Manage and schedule an email marketing calendar.
- Collaborate with cross-functional teams, such as Marketing, Creative, and Tech, by researching and communicating email issues leading to swift email problem resolution and successful campaign execution.

KEY CAREER ACCOMPLISHMENTS

- Upon hire, dramatically improved email deliverability and reputation by introducing the importance of removing disengaged email addresses in target contact lists.
- Established responsive emails, as well as new email QA process in former place of employment.
- Reduced a former website's home and search pages by 38K utilizing minimalistic Web 2.0 coding practices.
- Helped reduce a complicated website's downloading speed by approximately 60%.
- Coded and scheduled over 280 CRM emails within first four months of hire. Set up these emails in: StrongView, Optimail, Mailchimp and Iterable ESPs.
- Trained freelance clients on enterprise email marketing platform called Silverpop.
- Designed and updated hundreds of small business websites via a proprietary web-authoring tool during the Web 1.0 era.
- Trained new-hire designers in company systems and favored Photoshop techniques.
